

“How can I exchange my information securely and in compliance?”

Innovate Communication Gateway

Innovate E-Commerce is your communication gateway to business partners including your cash management banks, insurance companies and other 3rd party providers on a global scale. We are your one source for guaranteed, secure delivery of all of your data sensitive files, as well as keeping your files secure throughout the entire transmission process. Our exception-only audit system alerts Innovate’s staff when an issue arises enabling Innovate to resolve most problems before our customers or their business partner are even aware an issue occurred. Innovate’s secure environment provides encrypted secure connectivity, keeping your files guarded and protected from the pickup to delivery.

- **Connects globally to your business partners including cash management banks, insurance companies and other 3rd party providers**
- **Guarantees secure delivery of all data sensitive files**
- **Utilizes exception-only audits and controls system**
- **Provides automatic delivery notifications**
- **Minimizes your attack surface**
- **Customer Portal for real time visibility to files statuses**

Let Innovate E-Commerce be your gateway to safer, guaranteed delivery of all your important files. Innovate streamlines your business model to help you minimize your attack surface. As your one point of entry, you would connect to Innovate to process all your files minimizing the risk of data breaches. All files processed through our systems are archived for your security and are guaranteed to comply with your company’s protocols.

Innovate Audits & Controls are built into our processes. Innovate Audits & Controls will notify our staff that an issue has occurred with the transmission of a file. In most cases the issue is resolved before our customer or their business partners are aware an issue occurred. Innovate Audits & Controls can have business rules setup to ensure your files are delivered on time and securely. Our system has customizable, automatic delivery notifications that will send status alerts throughout the entire transmission.

Innovate Communication Gateway is cost-effective and worry free, eliminating the costs of communication software, maintenance and resources to support your file pickup and delivery transmissions.
